Brief

I'm a software developer based in Melbourne, Australia.

I have experience in the broad areas of web development, mobile & desktop application development, DevOps & SysOps.

My previous roles have given me project leadership experience with respect to both the internal coordination of a development team and an external correspondence with clients.

I have a strong interest in the linux operating system, various programming languages (modern C++, PHP & rust are among my favourites) as well as low level graphics libraries (OpenGL, Vulkan & D3D).

Past Employment

Encapto WiFi — encapto.com

Melbourne, AU — Software Developer — 2015 - Present

- Lead the development of a new RESTful API to enable third parties to interface with our system.
- Contributed to continued development and expansion of a WiFi hotspot cloud management and reporting platform including containerisation of each component and integration into a complete kubernetes cluster solution.
- Assisted in the deployment of large scale implementations accross Australia, New Zealand, United Kingdom, India and others.
- Managed a back-end team of software developers during which time I made extensive use of various devops tools and methodologies.
 - JIRA - Issue tracking and project management tool.
 - GitLab - Git server, continuous integration & issue tracking software.
 - Docker - Containerisation software.
- Other technologies used in this role include:
 - Kubernetes - Container orchestration system.
 - Ansible - Software provisioning, configuration and deployment automation tool.
 - Terraform - "Infrastructure as code" high level configuration language.
 - Selenium/Selenoid - Browser automation framework for integration testing.
 - PHPUnit - Unit testing software for PHP.

Chilli Pepper Media — chillipepper.com.au

Brisbane, AU — Junior Software Developer — 2010 - 2012

- This employer had a wide portfolio of clients which demanded a strong knowledge in, and an ability to learn, many different development environments.
- Technologies and tools utilised include:
 - A wide array of programming languages (PHP, JAVA, C#, Objective C among others).
 - Various database solutions (MySQL, MSSQL, postgres and more).
 - Multiple development environments such as Visual Studio, Eclipse (Android SDK) and X-Code (iOS SDK).
- High volume mission critical e-commerce.
- Mobile app development on both android and iOS platforms.

Education

Monash University, Melbourne, Victoria

Bachelor of Science (Mathematics Major), 2015

Griffith University, Brisbane, Victoria

Bachelor of Information Technology (Computing and Intelligent Systems Major), 2012

Skills, Interests and Achievements

- I have well developed PHP, MariaDB, Javascript, Apache, Nginx and related skills.
- I have used various linux distributions as my primary operating system for over 10 years and am very comfortable working in a linux environment.
- During my work at Encapto and Chilli Pepper Media I was able to prove my linux abilities in a professional setting by installing and managing countless linux based web servers, kubernetes clusters and internal DevOps/organisational systems.
- Aside from web development I have extensive experience with languages such as C/C++, C#, JAVA and Python.
- I also have a strong working knowledge of various libraries and toolkits such as OpenGL, Vulkan, QT and GTK with multiple hobby projects visible on [github](#) for reference.
- I have made many Android apps including a game, multiple quiz apps for learning Japanese and Greek ("KanaQuiz", "KanjiQuiz" & "GreekQuiz") and a tool that allows users to set their favourite vines as a live wallpaper ("VinePaper").
- My Android applications have accumulated an average rating of 4+ stars with roughly 120,000 installs.
- While employed at Chilli Pepper Media I worked on both the Android and iOS versions of "iGetAbout" and was the sole developer of the Android "Cineplex Cinemas" app (a local cinema chain in Brisbane) boasting 50,000 downloads and an average rating of 4.1 stars.
- Further examples of work are available on my github ([github.com/d0x2f](#)) and upon request.
