Brief

I'm a software developer based in Melbourne, Australia.

I have experience in the broad areas of **web** development, **mobile** and desktop application development, **e-commerce**, data **visualisation** and algorithmic problem solving.

My previous roles have given me **project leadership** experience with respect to both the internal coordination of a development team and an external correspondence with clients.

I have a strong interest in the **linux** operating system, various programming languages (modern **C++**, **PHP**, **JAVA** are among my favourites) as well as low level graphics libraries (**OpenGL**, **Vulkan** & **D3D**).

Past Employment

Encapto WiFi — encapto.com

Melbourne, AU — Software Developer — 2015 - 2017

- Contributed to continued development of a WiFi hotspot cloud management and reporting platform.
- Lead the development of a new RESTful API to enable third parties to interface with our system.
- Assisted in the deployment of large scale implementations accross Australia, New Zealand, United Kingdom, India and others.
- During the deployment in India, a small team and I were tasked with travelling to our clients corporate park complex in Mumbai to assist in the smooth integration of our software solution.
- Managed a back-end team of software developers during which time I made extensive use of various devops tools.
 - JIRA - Issue tracking and project management tool.
 - GitLab - Locally hosted git server, continuous integration & issue tracking software.
 - Docker - Containerisation software which we used as part of our build pipeline.

Moana IGA Fresh

Adelaide, AU — Web Developer & IT Consultant — 2013 - 2015

- Involved frequent remote correspondence and regular on-site work.
- Design and development of a dynamic landing page with regular news posts.
- Setup and integration of a third party inventory management and e-commerce solution.

Chilli Pepper Media — chillipepper.com.au

Brisbane, AU — Junior Software Developer — 2010 - 2012

- This employer had a wide portfolio of clients which demanded a strong knowledge in, and an ability to learn, many different development environments.
- Technologies and tools utilised include:
 - A wide array of programming languages (PHP, JAVA, C#, Objective C among others).
 - Various database solutions (MySQL, MSSQL, postgres and more).
 - Multiple development environments such as Visual Studio, Eclipse (Android SDK) and X-Code (iOS SDK).
- High volume mission critical e-commerce.
- Mobile app development on both android and iOS platforms.

Skills, Interests and Achievements

I have well developed PHP, MariaDB, Javascript, Apache and related skills.

I have used various linux distributions as my primary operating system for over 10 years and am very comfortable working in a linux environment.

During my work at Chilli Pepper Media I was able to prove my linux abilities in a professional setting by installing and managing several linux based web servers.

Aside from web development I have extensive experience with languages such as C/C++, C#, JAVA and Python. I also have a working knowledge of various libraries and toolkits such as OpenGL, Vulkan, D3D, QT and GTK.

I have made many Android apps including a game, multiple quiz apps for learning Japanese and Greek ("KanaQuiz", "KanjiQuiz" & "GreekQuiz") and a tool that allows users to set their favourite vines as a live wallpaper ("VinePaper").

My Android applications have accumulated an average rating of 4+ stars with roughly 120,000 installs.

While employed at Chilli Pepper Media I worked on both the Android and iOS versions of "iGetAbout" and was the sole developer of the Android "Cineplex Cineplex" app (a local cinema chain in Brisbane) boasting 50,000 downloads and an average rating of 4.1 stars. Further examples of work are available upon request.
